1. Answer to Question 1.

4  
—  
4

```
1: procedure COUNT_SORTED( $A, B$ )
2:    $i \leftarrow 0$ 
3:    $j \leftarrow 0$ 
4:    $count \leftarrow 0$ 
5:   while  $i < A.length$  and  $j < B.length$  do
6:     if  $A[i] > B[j]$  then
7:        $j \leftarrow j + 1$ 
8:        $count \leftarrow count + A.length - i$  ✓
9:     else
10:       $i \leftarrow i + 1$  ✓
11:    end if ✓
12:  end while
13:  return  $count$ 
14: end procedure
```

2. Answer to Question 2.

```
1: procedure COUNT_PAIRS( $C$ ) ✓
2:   return MERGESORT( $C, 0, C.length-1$ ) ✓
3: end procedure
4: procedure MERGESORT( $C, low, high$ ) ✓
5:    $count \leftarrow 0$ 
6:    $mid \leftarrow (low + high)/2$  ✓
7:   if  $low < high$  then
8:      $count \leftarrow count + MERGESORT(C, low, mid)$  ✓
9:      $count \leftarrow count + MERGESORT(C, mid + 1, high)$  ✓
10:     $count \leftarrow count + MERGE(C, low, mid, high)$  ✓
11:  end if
12:  return  $count$  ✓
13: end procedure
14: procedure MERGE( $C, low, mid, high$ )
15:    $count \leftarrow 0$ 
16:   for  $i \leftarrow 0$  to  $high - low + 1$  do
17:      $tmp[i] \leftarrow 0$ 
18:   end for
```

```

19:   $i \leftarrow low$ 
20:   $j \leftarrow mid + 1$ 
21:   $k \leftarrow 0$ 
22:  while  $i \leq mid$  and  $j \leq high$  do
23:      if  $C[i] \leq C[j]$  then
24:           $tmp[k] \leftarrow C[i]$ 
25:           $k \leftarrow k + 1$ 
26:           $i \leftarrow i + 1$ 
27:      else
28:           $count \leftarrow count + (mid - i + 1)$ 
29:           $tmp[k] \leftarrow C[j]$ 
30:           $k \leftarrow k + 1$ 
31:           $j \leftarrow j + 1$ 
32:      end if
33:  end while
34:  while  $i \leq mid$  do
35:       $tmp[k] \leftarrow C[i]$ 
36:       $k \leftarrow k + 1$ 
37:       $i \leftarrow i + 1$ 
38:  end while
39:  while  $j \leq high$  do
40:       $tmp[k] \leftarrow C[j]$ 
41:       $k \leftarrow k + 1$ 
42:       $j \leftarrow j + 1$ 
43:  end while
44:  for  $n \leftarrow 1$  to  $tmp.length$  do
45:       $C[n + low] \leftarrow tmp[n]$ 
46:  end for
47:  return count
48: end procedure

```
